There is a growing recognition that we can align our investment decisions with our values. Ultimately, we want our money to drive improvement in the world around us. This is exactly what our BMO SDG Engagement Global Equity Fund is designed to achieve.

**Investing to improve**

The fund is orientated around a clear ethos of invest, engage and improve

**Invest**

**Quality matters**

The bar we set when investing is high. Alongside strict criteria around the quality and value of a company, there must be clear opportunity for SDG-linked engagement.

**Engage**

**Driving improvement**

We seek to drive targeted improvement, focusing on how companies address ESG risks, opportunities and impacts. Engagement is structured around the SDGs and their underlying targets.

**Improve**

**Measuring our impact**

We monitor and measure the impact of our dialogue around defined SDG targets. We want to see improvement and continually assess the progress each company is making.

The fund aims to provide capital growth by investing in a well-diversified selection of global small and mid-sized companies. It seeks to achieve a positive impact through targeted, impact-focused, active engagement with companies, using the SDG framework.

**The Sustainable Development Goals – roadmap to a better future**

Developed by the United Nations (UN) and cross-industry stakeholders with a view to providing a roadmap towards a more sustainable world, enabling our investment specialists to encourage improvement within investee companies.
“We must strongly accelerate our broader efforts to achieve the Sustainable Development Goals... and we need increased financing for those solutions.”

UN Secretary-General António Guterres, 2019

**Investing checklist**

- **Quality matters** – Alongside factors like ‘competitive advantage’ we look for companies that effectively manage environmental, social and governance (ESG) issues – factors integral to assessing risk and reward potential.

- **Well managed** – Companies should be run by proven management teams, responsible in how they do business, appropriately incentivised and open to shareholder engagement.

- **Price matters** – We have a disciplined approach to valuation with a view to investing in companies at an attractive price and maintaining our holding for 5+ years.

- **Scope to drive improvement** – Only companies where we see scope for achieving improvement towards SDG targets warrant a place in the portfolio.

Our ambition is to deliver attractive investment returns and clearly demonstrate positive progress towards achieving SDG targets.

**Key risks**

This document does not constitute, and should not be construed as, investment advice or a recommendation to buy, sell or otherwise transact in the fund.

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested and in a worst case scenario there is a risk of total loss.

Investments in smaller companies carry a higher degree of risk as their shares may be less liquid and investment values can be volatile.

**Focusing our dialogue**
