## Monthly Commentary

As at August 31, 2023, the net asset value of BMO PG Fund was up (+0.60% net performance of Series F-CAD), largely driven by the private equity portfolio, while public equities fell by 0.02% (MSCI World Index<sup>8</sup>) due to concerns about prolonged higher interest rates. Amongst BMO PG Fund's positive value drivers was PCI Pharma Services ("PCI"). The provider of outsourced pharmaceutical services based in the United States was positively revalued on the back of robust financial performance. Over the 12-month period, PCI recorded increasing revenue and earnings before interest, taxes, and depreciation (EBITDA). This was mainly driven by strong organic growth, and the outperformance of its injectable business, Lyophilization Services of New England (LSNE). The acquisition of LSNE in 2021 marked PCI's entry to the sterile fill & finish market, which further supports the company's plan of becoming a top-tier integrated provider of supply chain solutions to the biopharma industry.

During the reporting period, Partners Group completed the acquisition of Biogeen (fka energielenker), a German biogas and biomethane platform which operates a 60-megawatt portfolio of 35 biogas plants and ten biomethane plants across northeast Germany. The investment in Biogeen is poised to benefit from strong secular growth trends accelerating the demand for biomethane, including regulatory support for clean energy sources, industrial decarbonization goals, and a heightened focus on energy independence. Partners Group will work with management on building out the platform's project pipeline and developing innovative ancillary service lines.
